## Advanced Reporting

Nextiva's industry-leading applications can be combined to address any enterprise configuration and all user types building a differentiated solution.

Nextiva applications are decoupled from the underlying architecture, which means total freedom to evolve the infrastructure.

**Reliability:** NextOS is proven software that runs on reliable, low-cost Solaris and Linux NEBS servers

**Scalability:** Major functions run on separate servers, which adding another server or upgrading an existing one.

**Availability:** Local and geographic redundancy provides zero downtime on upgrades and repairs.

**Maintainability:** Essential network management interfaces and tools plus end-user IP Phone configuration and with Nextiva Device Management.

## Key Features

With Hosted VoIP service, your employees will experience an unparalleled set of productivity-enhancing features:

- Remote Office – Users can take their offices on the road with them
- Nextiva Anywhere – Nextiva's unified communication solution
- Selective Call Forwarding – Allows employees to decide who reaches them, at what number, and when
- Pre-integrated Services – Voice/Video/Fax mail, Call Centers, Conferencing and Personal Mobility.

A host of powerful personal as well as enterprise features provides carriers the tools they need to serve small office/home office (SOHO), medium and large enterprise markets.

## Client Applications

Nextiva offers a suite of client applications that put the power of Hosted VoIP just a click away and keeps the service provider's brand name on the user's desktop.

- Nextiva Assistant-Enterprise Toolbar is a carrier-class, lightweight desktop communications management product for everyday users of Microsoft Outlook, Microsoft Internet Explorer, or Mozilla Firefox. Users can manage incoming and outgoing messages, maintain up-to-date connection information, and configure controls on calls and voice mail.
- Nextiva Receptionist is an attendant console for use by receptionists or telephone attendants who manage and screen inbound calls for enterprises.
- Nextiva Call Center Agent and Nextiva Call Center Supervisor are tightly integrated with the Nextiva Call Center service. All these elements combine to provide a Call Center solution, in which all the functionality is exposed through a compact and concise user interface.

# The Nextiva App

Takes business mobility to the next level

Telephone communications have greatly evolved over the past several decades, from rotary phones in homes, to cordless devices in offices, to mobile phones in every pocket. With the growing popularity of smart devices and virtual business practices, Nextiva recognizes the necessity of being able to stay in touch while on-the-go.

The Nextiva Mobile App takes business mobility to the next level by giving users the freedom to use and manage their business phone system anywhere, at any time.

## Overview

The Nextiva App is the primary access point for business users to manage their unified communications solution. It has never been easier to use voice, video, instant messaging and presence services from a single device. Users can access business phone account information and feature settings from their computer, tablet or any mobile device. The app is supported in Windows, Mac OS, iOS or Android platforms.

## Nextiva App Benefits

The Nextiva App enables a new level of flexibility and productivity that truly changes the way businesses operate. No longer tied to a control panel interface or required to have system administrators make changes, users can instantly update their communications service from anywhere.

- **Chat Rooms & IM** – Activate chat rooms or engage in instant messages with coworkers that appear simultaneously on multiple devices
- **Voice Calling** – Make and receive calls from any of your devices while displaying your business number to those you are calling
- **Video Collaboration** – Save the travel time and costs when you connect face-to-face virtually with HD video calls with other Nextiva App users
- **Presence** – Adjust your availability settings or easily check the status of a contact to determine the best time and method to reach them
- **Cloud Sync** – All of your contacts, voice mails, call history, and settings are simultaneously synced to the cloud and available on any device on your Nextiva account
- **Call Pulling** – Seamlessly transfer your active voice and video calls between your office and mobile phone

## Summary

The Nextiva App is compatible with Nextiva Office Pro and Enterprise plans and can be quickly added to customer accounts. A simple download from our website of the version you need and a quick call to our support team will add the freedom and mobility of the Nextiva App to your business communications.
